

SA-1 Speaker Amplifier

Front View of SA-1 Speaker Amplifier

Rear View of SA-1 Speaker Amplifier

FEATURES

- 600 ohm input from DCB SR/VM voice mux
- 4 watts into 8 ohm speakers
- Volume control
- Power and receive indicators
- 110 or 220 volt power supplies
- Rack mount face plate option

DESCRIPTION

The DCB SA-1 is a 4-watt amplifier for 8 ohm speakers. The SA-1 connects the E&M voice output of the DCB SR-08/VM1 voice and data multiplexers. The SA-1 provides impedance matching and amplification for PA type speakers in a receive only application. There are front panel indicators for power and to indicate that the receive voice channel is active. There is also a volume control for the speaker.

SPECIFICATIONS

Connectors:

- RJ-45 to connect SA-1 to the E&M output of the DCB SR-08/VM1 mux
- 2-wire connector to connect to a speaker

Controls:

- Speaker volume control

Physical/Electrical:

- 1.5" x 5.75" x 5.5"
- Rack mount front plate option, 1.75" high
