8	SG

DESCRIPTION

This part, 9502204, is an accessory part for the Loop 4 port mini E&M card. The E&M mini-card is used in the V4200-9 and the AM3440 B, C and D chassis. The E&M mini-card has a high density 44 pin D-style connector. The card ships with an HD44 to 4-RJ45 fan out cable with RJ plugs on the cable ends.

The 9502044 is an alternative connection option that adapts the HD44 to 4 – RJ45 jack connectors. It is easy to connect RJ45 cables directly into these jack connectors, rather than the RJ45 plug ends. No RJ45 couplers or patch panels are needed.

SPECIFICATIONS

Connectors:

1 - HD44 male connector to 4 – RJ45 connectors on a circuit board with screws to fasten to the Loop 4 port E&M mini-card.
