

## 9502231 DB25 to RJ45 Adapter for mini 4 Port T1 Card

### FEATURES

- Adapts DB25 connector to 4 – RJ45 T1 ports
- Use with the mini 4 Port T1 cards for the Loop AM3440A, B, C, D and E chassis
- Easier cable connections
- Provides 4 RJ45 connectors per card
- Simplifies wiring

RJ45 Connector Pin outs:

Pin Number	Description
1	Receive Tip
2	Receive Ring
3	n/c
4	Transmit Tip
5	Transmit Ring
6	n/c
7	n/c
8	n/c

This part, 9502231, is an accessory part for the Loop AM3440 mini 4 port T1 card. The mini T1 card is used in the AM3440 A, B, C, D and E chassis. The E&M mini-card has a DB25 D-style connector. The card ships with a DB25 4-RJ45 fan out cable with RJ plugs on the cable ends.

The 9502231 is an alternative connection option that adapts the DB25 to 4 – RJ45 jack connectors. It is easy to connect RJ45 cables directly into these jack connectors, rather than the RJ45 plug ends. No RJ45 couplers or patch panels are needed.

The pin out of the 9502231 adapter matches the wiring of the other Loop T1 RJ45 connector jacks.

### SPECIFICATIONS

#### Connectors:

1 - DB25 male connector to 4 – RJ45 connectors on a circuit board with screws to fasten to the Loop AM3440 mini 4 port T1 card.

How to Order:
